

# SENIOR LEADERS PROGRAM

## GROWING YOUR LEADERSHIP SKILLS WITH OPAL HEALTHCARE

The Opal HealthCare Senior Leaders Program provides support and personal development for those in leadership roles looking to take their leadership skills and career to the next level. This is a structured twelve month program where leaders across our organisation come together and collaborate to learn strategic skills to lead at the next level. Throughout the program participants will complete work based projects which demonstrate our leadership framework. At the conclusion of the program participants will present back their work based project in order to graduate successfully from the program.

At Opal HealthCare we know that companies don't succeed, people do and our teams succeed because our leaders focus on three areas: leading themselves, leading others and leading through change to deliver the Essentials of High Performance.

## SENIOR LEADERS PROGRAM OVERVIEW
